TM **CPAT** CHANGE PROFILE & ADAPTABILITY TOOL

Scientifically Validated

Built on 15+ years of organizational psychology research and validated across industries worldwide.

Reduce Failure Rates

Organizations using CPATTM report up to 63% reduction in change initiative failures.

Predict Change Success

Measure and predict employee readiness, capability, and energy for change initiatives.

Faster Change Execution

Achieve up to 41% faster implementation timelines with lower resistance.

Only 34% of organizational change initiatives succeed—while the rest fail due to resistance, fatigue, and lack of workforce readiness.

CPATTM enables organizations to scientifically assess, predict, and actively develop their people's ability to adapt to change—turning transformation into a repeatable competitive advantage.

TM

CPAT

CHANGE PROFILE & ADAPTABILITY TOOL

Your Complete Change Intelligence Journey

CPAT™ is not just an assessment, it is a comprehensive change intelligence system that helps organizations understand readiness for change, anticipate resistance, and design targeted interventions at the individual, team, and enterprise levels.

3 Core Components Across 6 Critical Dimensions

1 Core Components
