A Business Simulation Game

Comprehensive Business Simulation

Computer-based model simulating a complete manufacturing company with two product lines. Manage everything from raw materials to market distribution in a realistic business environment

Learn by Doing Methodology

Master functional interconnections without information overload. Gain 3-5 years of business experience in just 8-12 hours through accelerated skill development in a safe learning environment.

Strategic Decision-Making Framework

Make critical decisions including make-or-buy choices, product mix optimization, market strategy, financial management, and operations planning in real-time scenarios.

Team & Solo Play Options

Compete against other teams or AI opponents. Fully customizable scenarios to match your curriculum with complete classroom materials and auto-grading analytics built in.

Transform Learners into Strategic Leaders Through Immersive Business Simulation.

The Business Simulation That Develops Real-World Strategic Leaders.

The Business Education Challenge

87% of employers report graduates lack practical decision-making experience.

3X higher retention rate with simulation vs. traditional lectures.

65% of students prefer experiential learning over traditional lectures.

50K+ students trained globally across 200+ institutions.

Traditional Education Falls Short:

- Theory without application - Students learn concepts but can't apply them
- Limited cross-functional understanding - Difficulty seeing business as an integrated system
- No safe environment for mistakes - Fear prevents experimental learning
- Insufficient collaboration practice - Limited team-based problem solving experience

The Solution: Mogul CEO™

Mogul CEO bridges the gap with hands-on business simulation that delivers measurable learning outcomes:

- Strategic Decision-Making - Evaluate scenarios and make data-driven decisions
- Cross-Functional Integration - Understand how all business functions drive success
- Team Leadership - Develop collaboration and communication skills
- Financial Literacy - Master budgeting and profitability analysis
- Operations Excellence - Optimize production systems efficiently
- Risk Management - Identify and mitigate business risks effectively
