WIN THE MARKET GAME

Real Market Sales Pressure

Participants operate in realistic sales scenarios that replicate the urgency, competition, and uncertainty of real-world selling.

Decision-Making Under Fire

Every sales decision—target selection, pitch approach, negotiation style—creates immediate consequences.

Competitive Selling Dynamics

Teams compete head-to-head, facing rivals, limited opportunities, and changing customer behaviors throughout the simulation.

Gamified Sales Execution

Sales skills are developed through action, competition, and feedback not theory or scripted role play.

Winning the Market is Not Only About Closing Deals - It's About Performing Like a Negotiator and Collaborating Like a True Sales Professional.

The Sales Performance Crisis

42% of sales reps miss quota

75% of managers report their teams lack core selling skills

\$240K average cost of a failed sales hire - including recruitment, training & lost revenue

24% only 1 in 4 sales forecasts are accurate within a 10% margin of error

The Solution: TARGET HUNTER™ Simulation

An intensive, competitive simulation where teams pitch, negotiate, battle, and close — just like in the real world:

- Compete in structured pitch rounds - 5 minutes per salesperson, sequential continuation until the deal is won or lost
- Trigger Pitch Battles to challenge rival teams in high-stakes, head-to-head debate-style showdowns for the customer
- Deploy Discount Cards and Bundle Offers strategically to close resistant customers and earn bonus scoring points
- Score on 5 equally weighted dimensions: Understanding Needs, Demonstrating Value, Objection Handling, Relationship Building & Closing
- Build Sales Continuum momentum - every deal beyond the first two earns escalating bonus points toward Market Leader status
